

## Module-3 SSRS

1. Using the newly created DWH - SQL Server, generate different reports

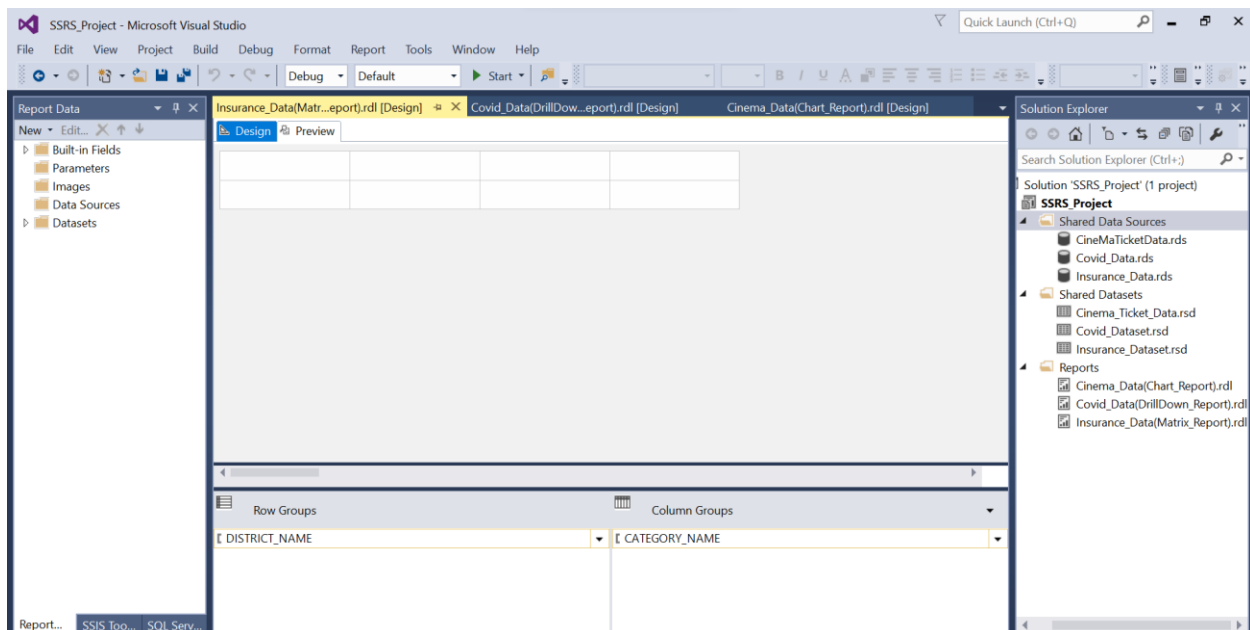

a) Dashboard

b) Reports

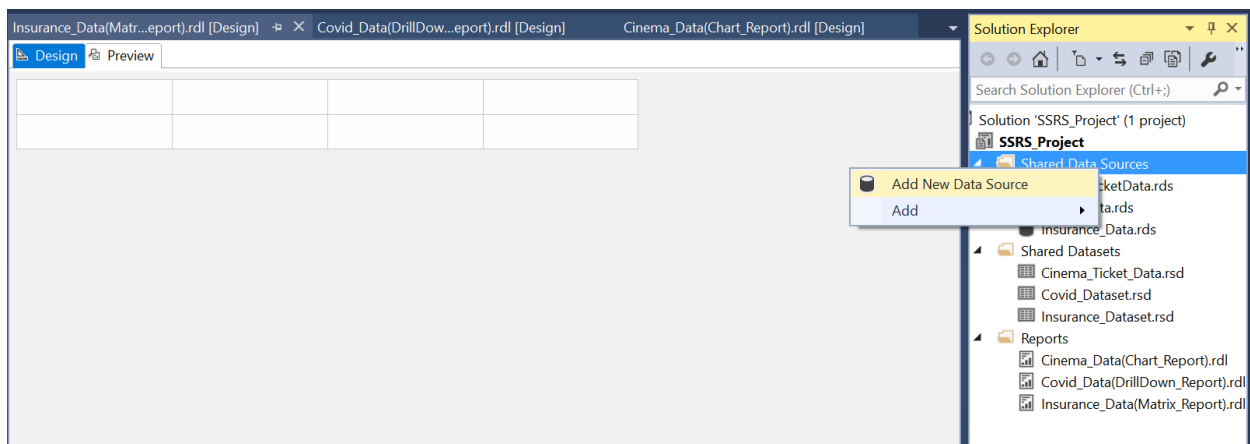

Apply the filter on Dashboard and report level. Create meaningful reports

Table Report

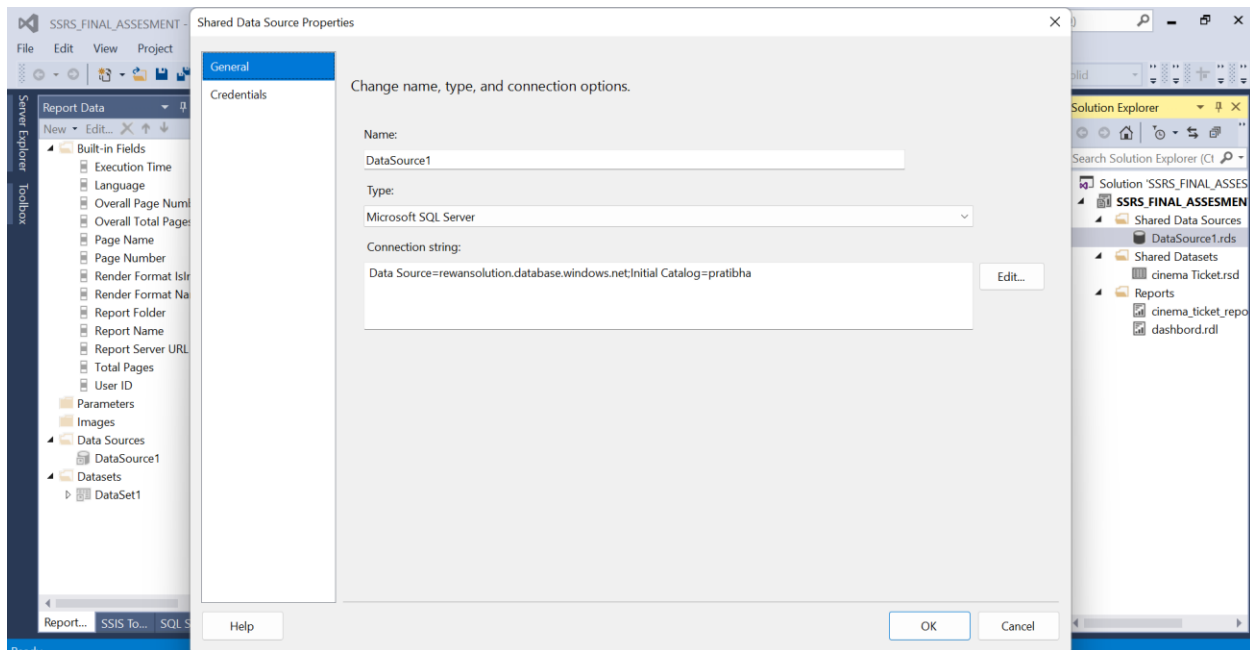

Step1: To Create new report click on Shared Data Sources

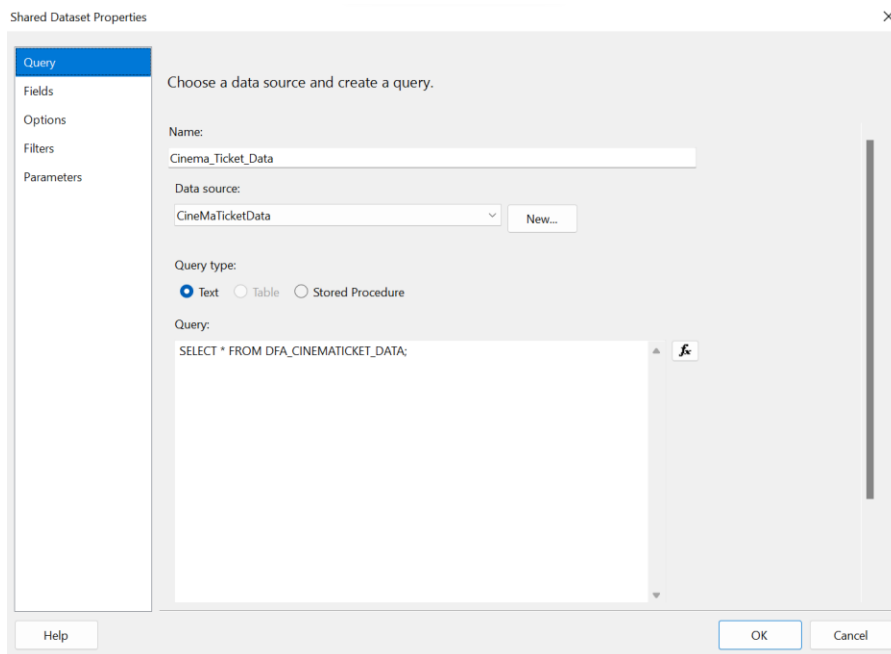

Step2: Click on Add New Data Source

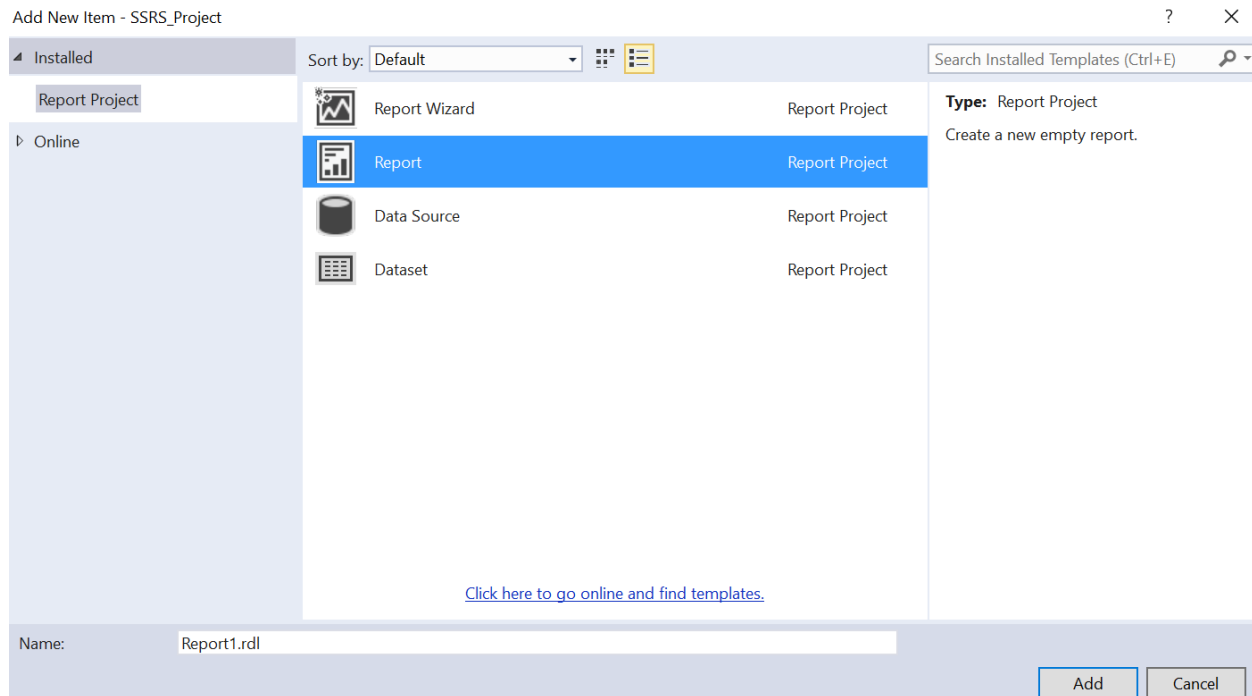

Step3:Give the Name and make the connection to database in Connection String.

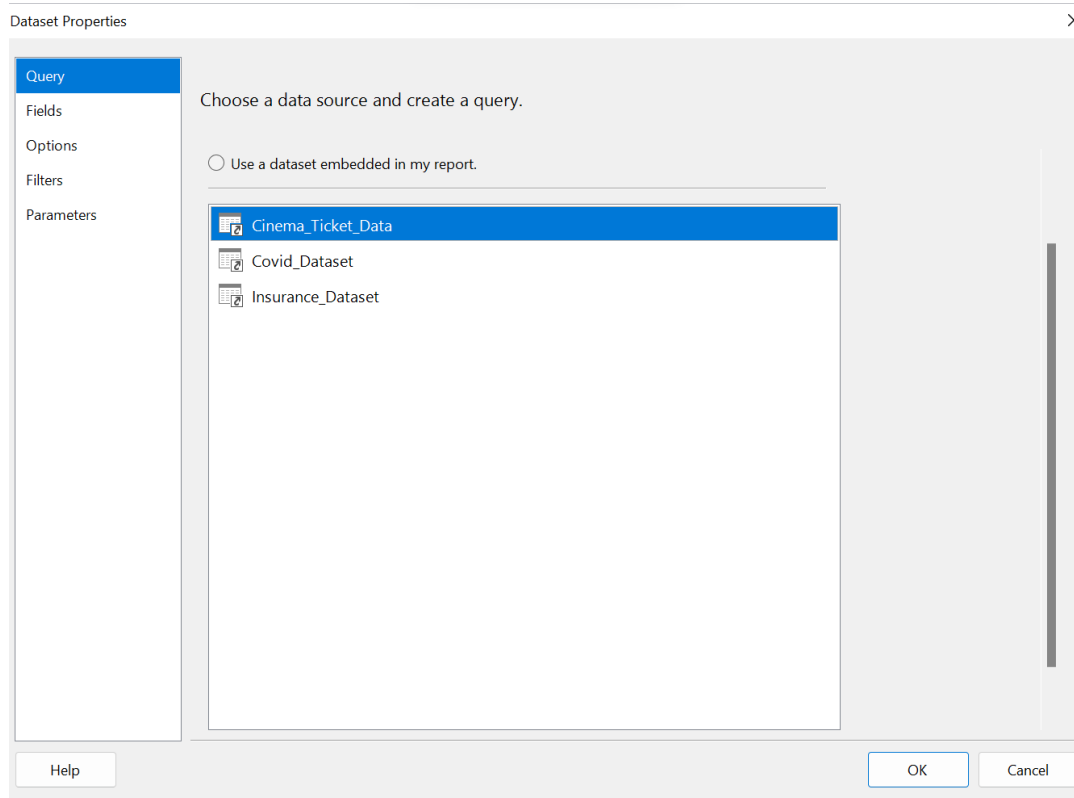

Step4:To select the required table write the select query in Query.

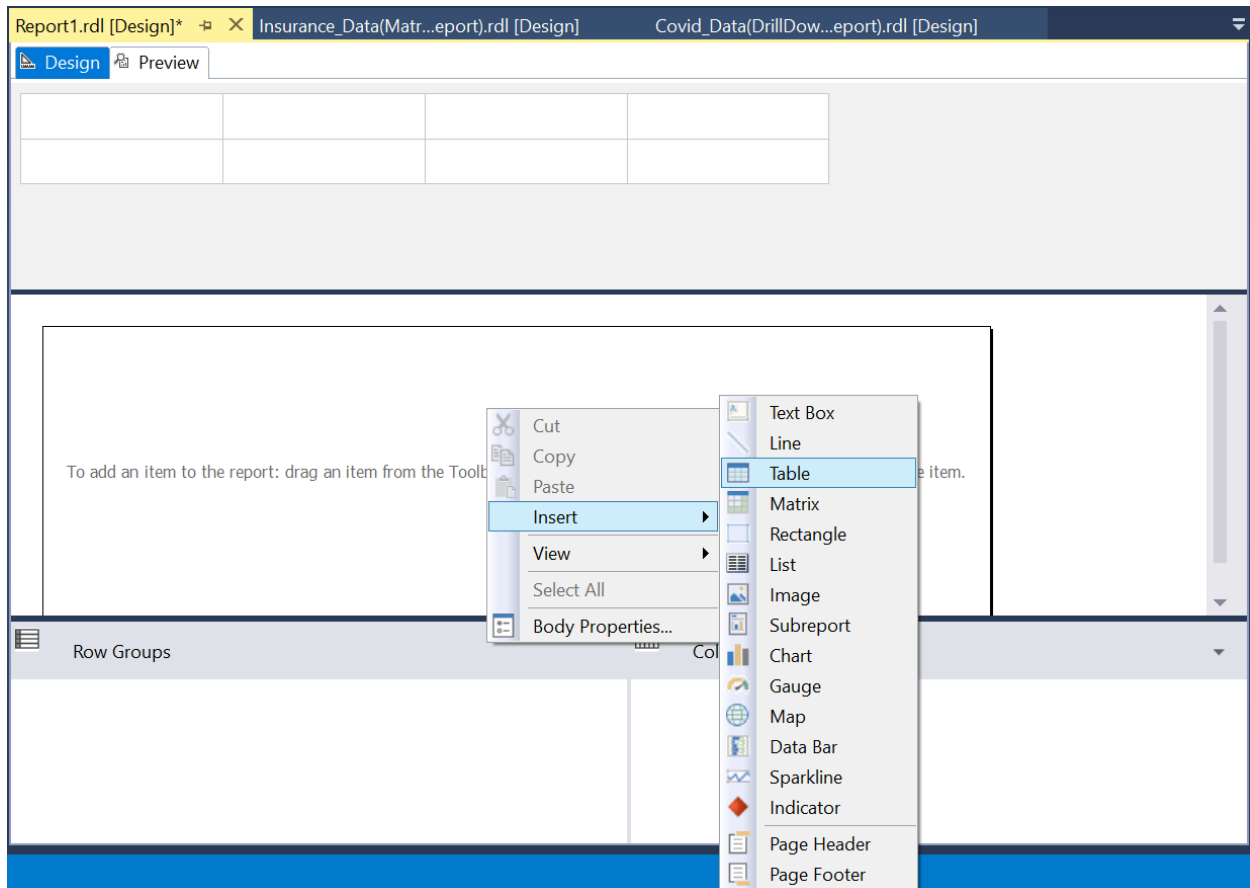

Step5:Right Click on Report->Add new item->Select Report->Add

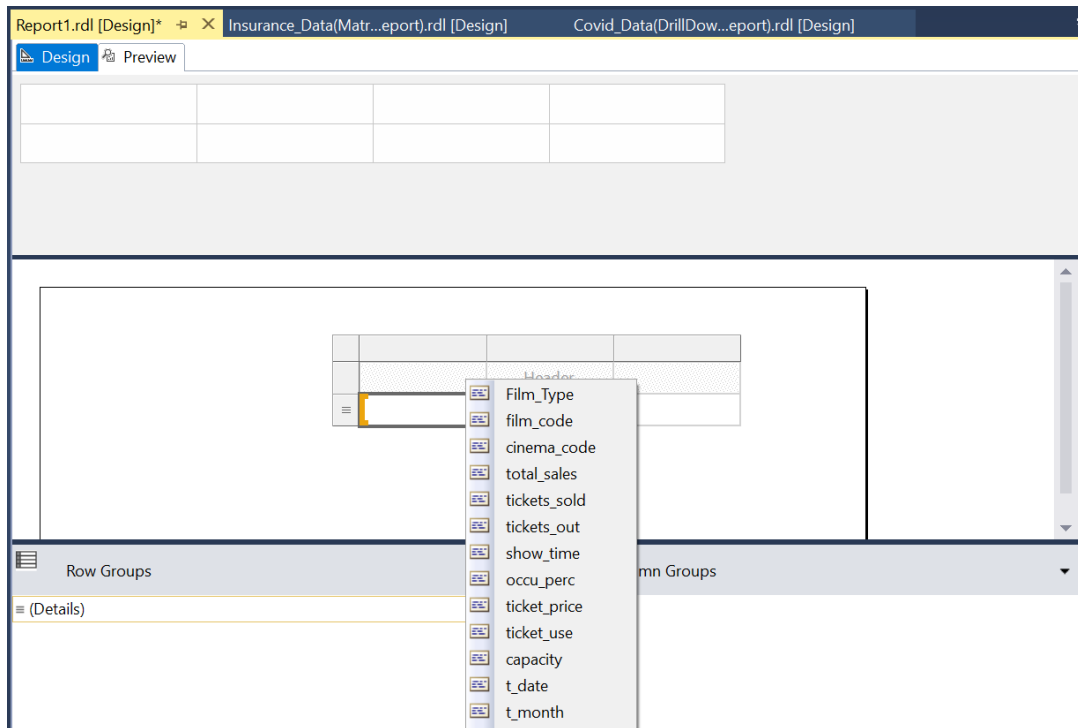

Step6: To make the report click on Shared Dataset and Select the required dataset.

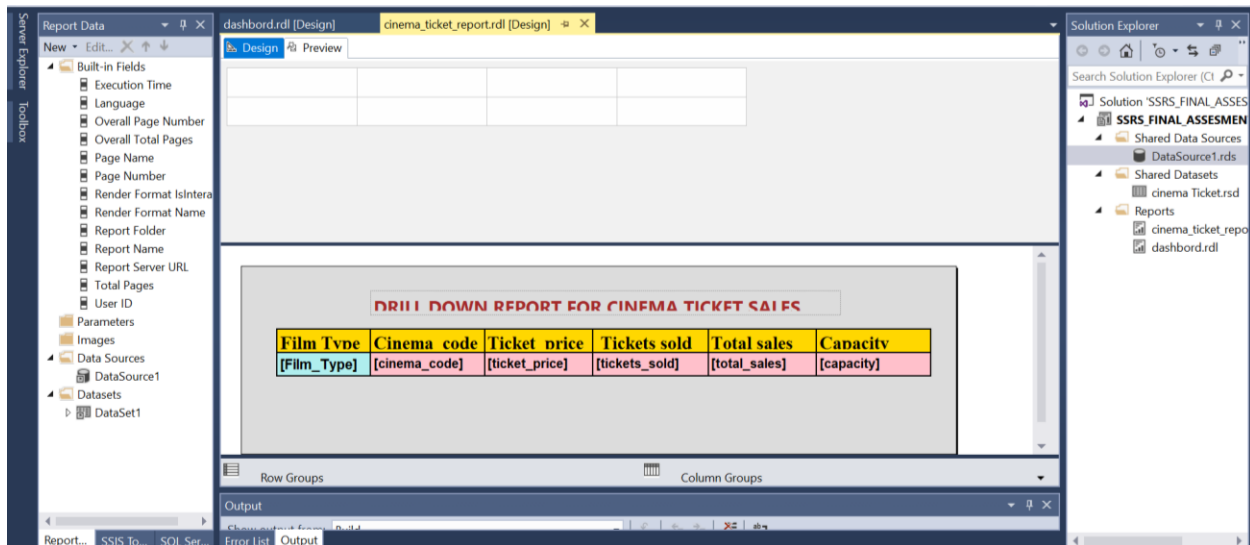

Step7:To add item to report right click on the space provided and click on insert and select Table for report in tabular form and can click on matrix for matrix report and chart for visual form of reports.

Step9:After selecting the Table->Click inside table to select the required column from the dropdown box.

Step10: Select the required column and give the desired color and font and font style to the columns to format the report.

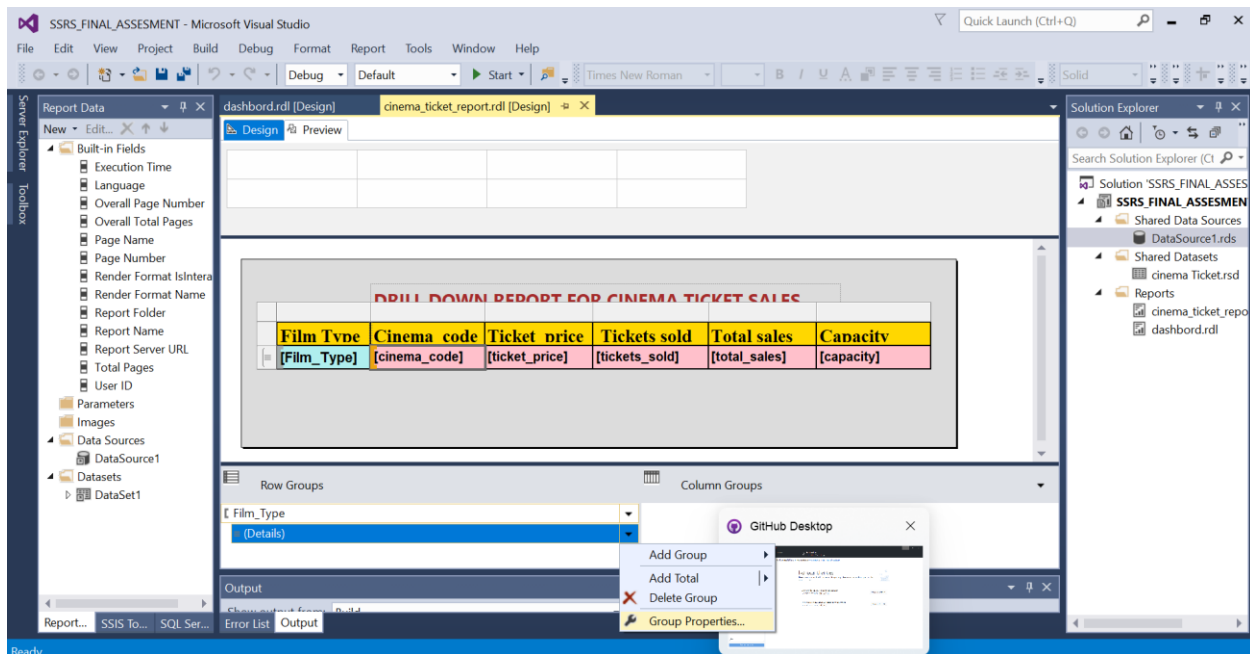

Click on the Preview to View the Report and to download the Report.

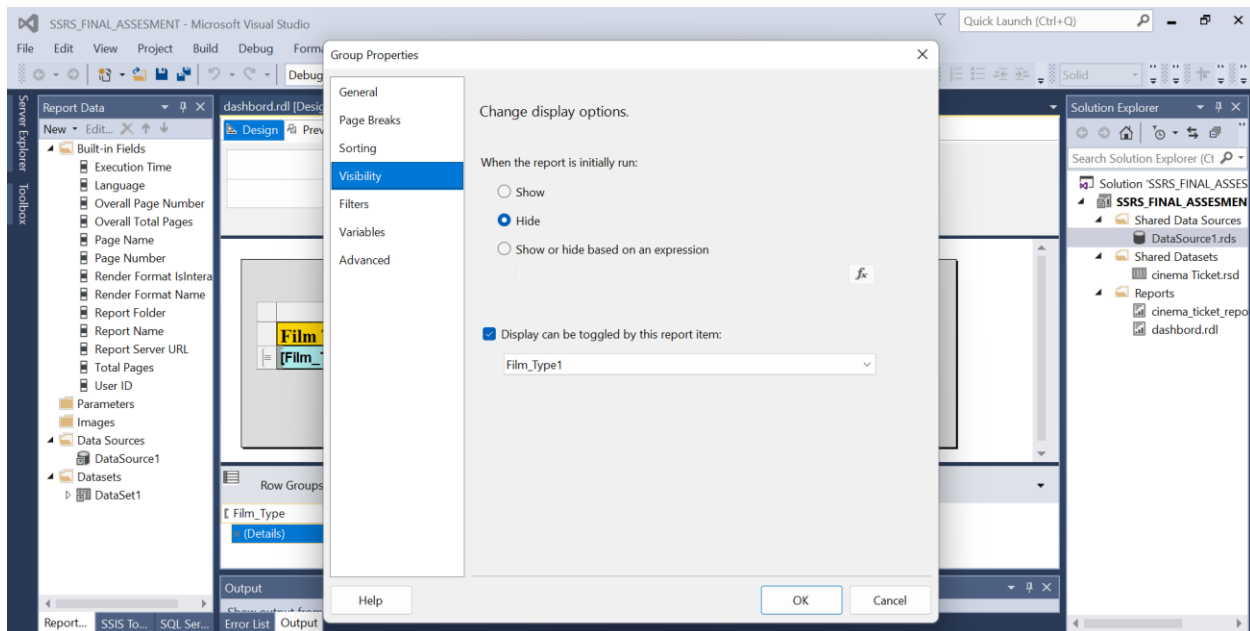

Similarly using the Properties created the Drill Down Report and used Chart to show the data visually in the form of Bar Graph

For drill down report

Step11: click on group properties as shown in below

Step12: click on visibility and choose hide and select the report item click on ok

Click on preview and view the report

Report Data | dashboard.rdl [Design] | cinema\_ticket\_report.rdl [Design] | Solution Explorer

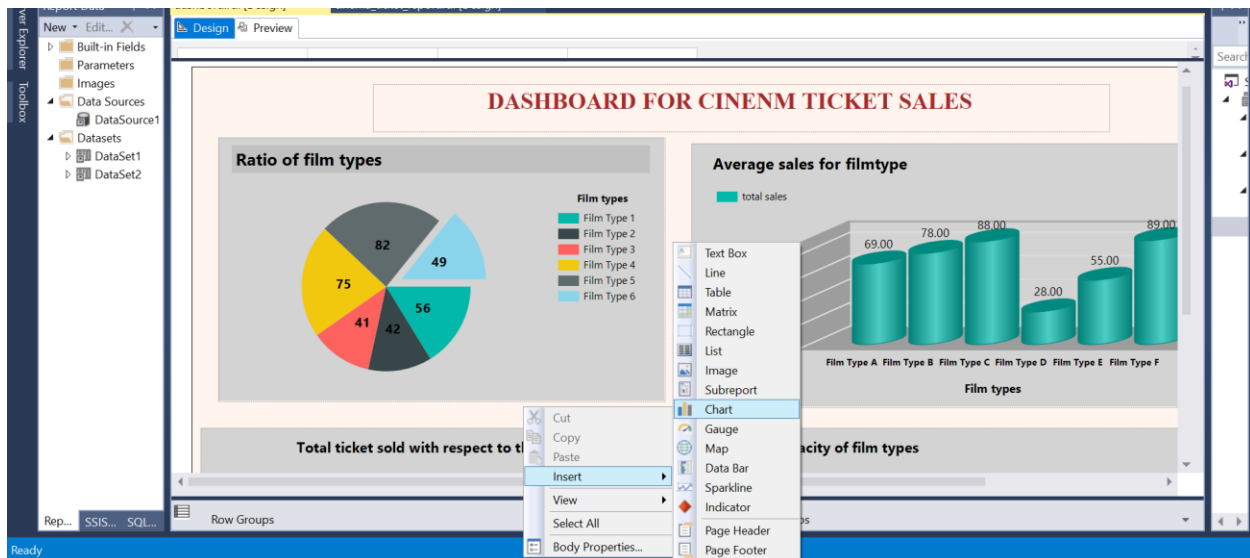

DRILL DOWN REPORT FOR CINEMA TICKET SALES

Film Type	Cinema_code	Ticket_price	Tickets sold	Total sales	Capacity
Action	34	120000	1553	186360000	2700
Comedy	455	40000	162	6480000	1050
Drama	362	70000	2	140000	317
Fiction	141	80000	63	5040000	527
Romance	304	150000	26	3900000	610
Science	180	80000	131	10480000	732
Thriller	163	115078.534	191	21980000	590

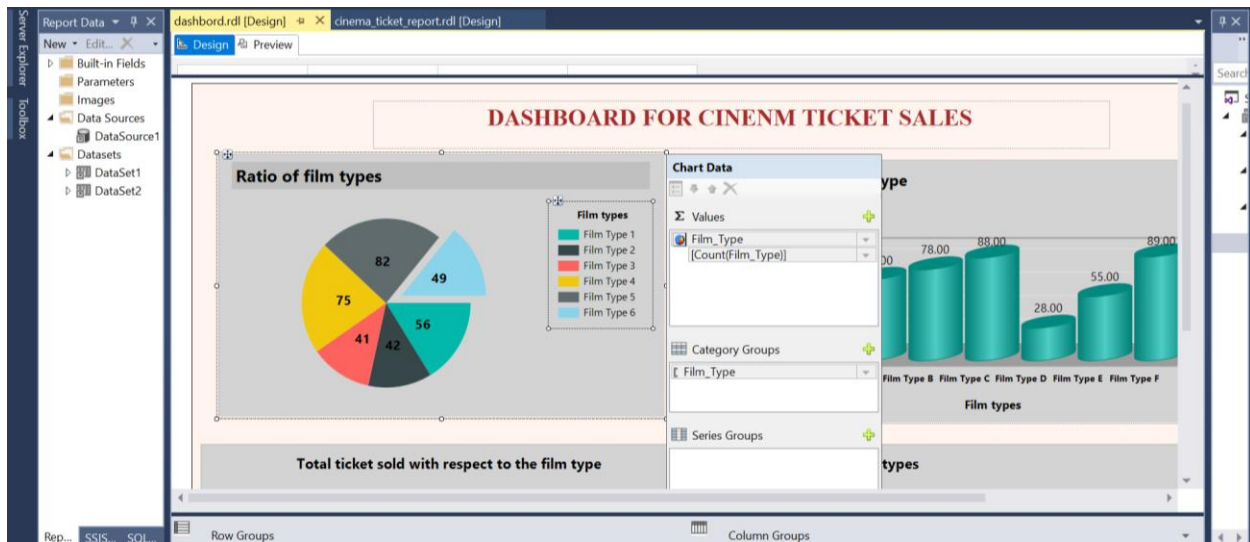

Server Explorer | Report Data | Solution Explorer

Created the Dashboard using multiple charts such as Bar graph, Pie Chart and Line Graph using Cinema\_Ticket\_Data dataset

Step1: rightclick->insert->select chat

Step2: click on chat and select the field foe x and y axis

Step4: click on preview to download

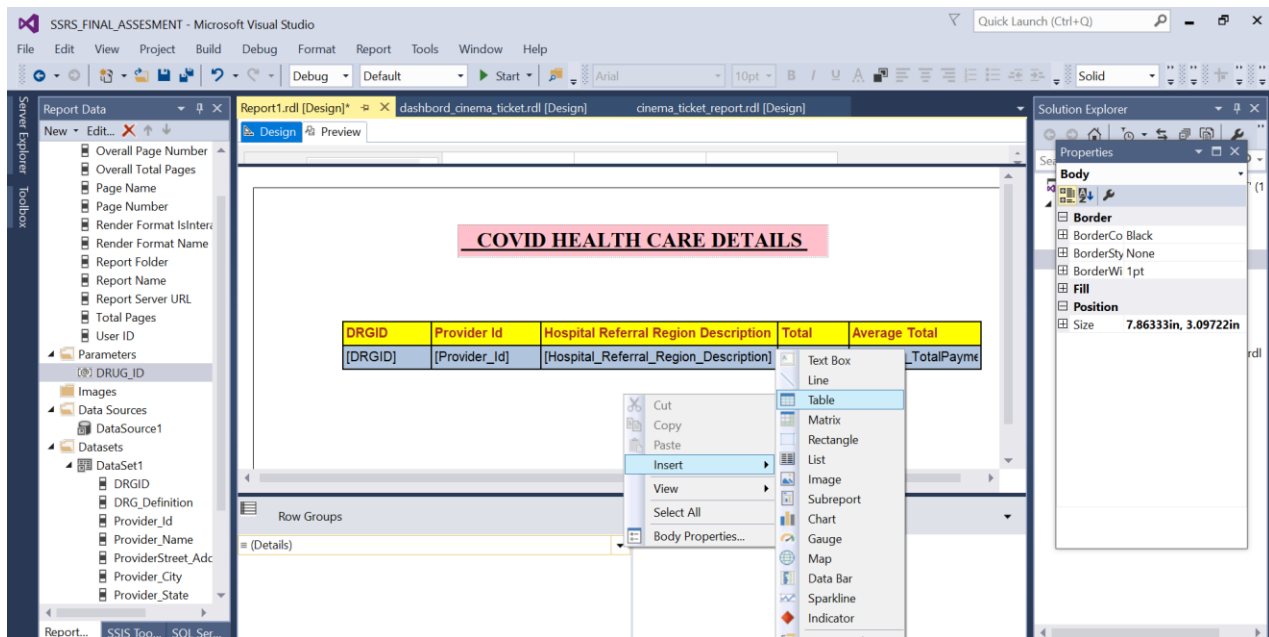

Below is the snapshot of dashboard

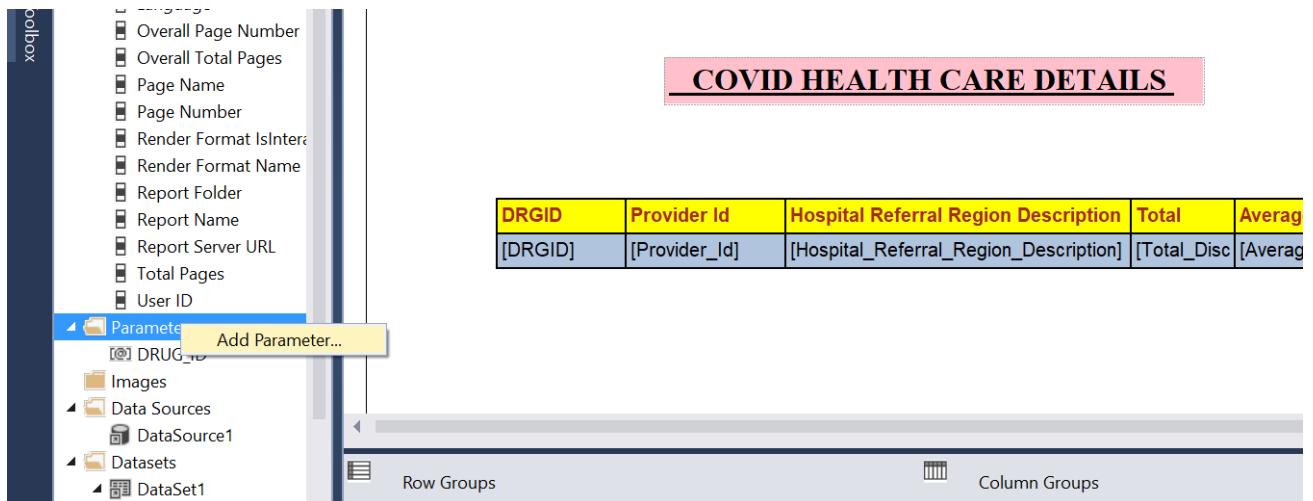

Created the Report using List of values for covid health care details

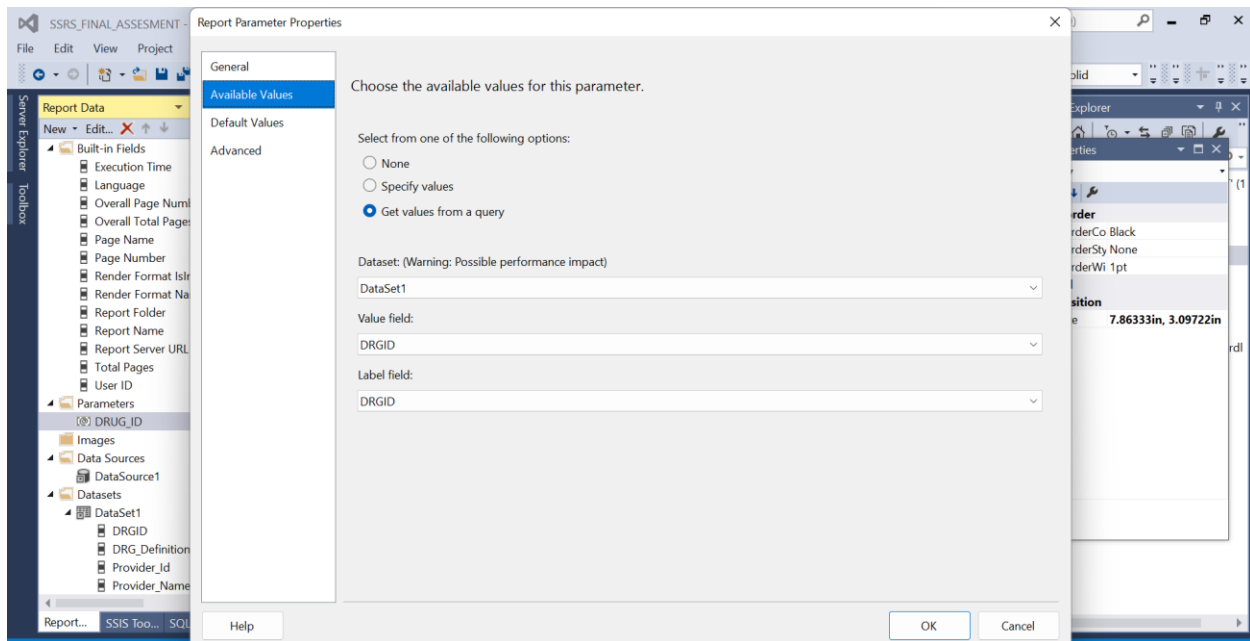

Step1: insert table by right clicking on the window

Step2: click on parameter and add new parameter

Step3: click on available values and select dataset and field and label and click ok

Step4: click preview report select the value and click on the view report

Snapshot of resultant table

**COVID HEALTH CARE DETAILS**
